SUBJECT: Transmittal of Revised Analytical Results Report of
Air Sampling at Richardson Flat Tailings,
TDD R8-8608-05.

Attached is the revised Analytical Results Report of Air Sampling at Richardson Flat Tailings, TDD R8-8608-05. In response to Utah Bureau of Solid and Hazardous Waste comments on the Air ARR, dated February 24, 1987 (attached), the following adjustments have been made.

1. Table 3 has been amended to include data qualifiers.
2. Because the laboratory was required by contract to provide IDL (instrument detection limit) data in units of $\mu\text{g}/\text{filter}$, and did not, reference to "pending action or verification" was made in the SAS validation package. Appropriate unit conversions were made by FIT during the development of Tables 1 through 4 of the Air ARR. Secondly, the lab failed to include % RSD (relative standard deviation) values as required by contract. The values would further substantiate close agreement of duplicate sample results, but would not change data validity or interpretation.
3. The Site Inspection form has been updated based on current information.

If you have any questions or comments, please call me at 757-4984.
